Smart **Package** Room®

Package Management Solution

Overview

The Smart Package Room® (SPR) is Position Imaging's package management solution for Multi-unit Residential properties, Office complexes, University campuses and Mail Centers. The system leverages Position Imaging's user-friendly, innovative Computer Vision technology to track packages and uses laser guidance to ensure simple and secure package delivery and retrieval.

The Smart Package Room empowers any property to easily implement an affordable, scalable, self-serve package management solution. It tracks delivery by couriers and simplifies pickup for residents. SPR offers contactless pickup, reduces potential loss or stolen packages and increases staff productivity by allowing staff to focus on their core duties.

View how Smart Package Room works

Smart Package Room package delivery

### SPR vs Lockers
Fast Delivery and Better Use of Space

- Easier to deliver packages (no hunting for the right sized locker)
- Faster package retrieval < 30 seconds
- Flexible space ensures higher utilization
- No bulky hardware (lockers waste roughly 33% of your space)
- Easier to install and move

Why Computer Vision for Package Management?

Fast

- Place items at random: no need to barcode, alphabetize, or bin
- Delivery/pickup times in under 30 sec.
- Laser guided package identification

Contactless Pickup

- Contactless solution using barcode scan
- Intuitive user interface with audio and visual guidance for error free locating
- No staff interaction required

Secure

- 24/7 monitoring of room and packages
- Incorrect pickup results in audio and visual notification
- Provides proof of pickup

Dynamic

- Can be self-serve or staff assisted
- Scalable with changing volume
- Monitor packages of any size
- Customized room design to fit your space

Cutting Edge

- Most advanced solution on the market
- Leverages proprietary and patented technology
- Future-proof your operations with a continuously improving solution
